

Lam Pham

253-455-3286 | lamtpham705@gmail.com | [linkedin.com/in/lampham](https://www.linkedin.com/in/lampham)

EDUCATION

University of Washington - Seattle

Expected Graduation: June 2027

Bachelor of Science, Computer Science

GPA: 3.79

- **Relevant Coursework:** Algorithms, Data Management, Data Structures & Parallelism, Hardware/Software Interface, Distributed Systems, Artificial Intelligence, System & Software Tools, System Design, Computer Security

EXPERIENCE

Incoming Undergraduate Research Intern | Interactive Data Lab

Seattle, WA

University of Washington

Jan. 2025

Full-Stack Software Development Intern | members.veym.net veym.net

Seattle, WA

Vietnamese Eucharistic Youth Movement

March 2024 – Present

- Spearheaded the design and full stack implementation of robust user management features for **5000+ users**, including enhancements to user functionality, automated notification systems, and advanced search filtering, **increasing support efficiency by 40%**.
- Developed a **CI/CD pipeline** for automated, version-controlled SQL updates, ensuring system stability, data integrity, and compliance for **10,000+** user records with robust **auditing** and **logging**.
- Developed a caching system by scripting automated cache population and created new routes and schemas for JSON responses, resolving over **10 critical bugs** and enhanced system performance and reliability.
- **C# (.NET Core), React, TypeScript, Next JS, SQL, Azure Pipelines, Azure B2C, Azure AD, cronjobs, Virtual Machines (VM)**

Software Development Intern | PrayerBox App PrayerBox Website

Seattle, WA

iD2, University of Washington Student Startup

Sept. 2024 – Present

- Architected and launched **PrayerBox**, a full-stack React prayer platform serving **500+ users**, featuring real-time group interactions and achieving **1000+ posts** and **5000+ reactions** within first month of release.
- Architected a frictionless authentication system using email-based passwordless authentication, **improving user retention by 80%** through simplified onboarding.
- Engineered a front-end modular UI system with reusable Tailwind/Material components, reducing development time by **75%** and increasing mobile user engagement by **35%**.
- **React Native, instantDB, Tailwind CSS, Capacitor, 500+ DAUs**

PROJECTS

My Spiritual Journal | *MERN (MongoDB, Express, React, Node) + Redux*

May 2024 – Present

- Developed a social Bible journaling app using the **MERN Stack** with **Redux** for state management, and Bible API for devotional entries. **Achieved 40+ DAUs** and **150+ journal entries** within first month of release.
- Rapidly developed **full-stack** features enabling user interactions, including group, journaling, and commenting, etc., **increasing user engagement by 20%**.
- Participated in weekly **Agile** meetings, contributing to the rapid iteration of product features and improvements, and collaborated closely with cross-functional teams to align development efforts with strategic objectives.

Opticars | *Python, SQL, Pytorch, TensorFlow, Keras, NumPy, Pandas*

Sept. 2023 – June 2024

- Developed an eye-controlled **Arduino** mini car to enhance **accessibility** and empower individuals with limited motor abilities using the Tobii Pro Fusion 3.
- Integrated **live video streaming** and **local server processing** of eye tracker data for real time control of vehicle speed and direction using **algorithms** inspired by Mohr's Circle.
- Designed a **user interface** providing discretized feedback on gaze direction for intuitive control and conducted user testing, demonstrating **95% user satisfaction and ease of use**.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, Python, C, C# (.NET CORE), C++, HTML/CSS, R, PHP, MySQL

Frameworks: React, Node.js, Next.js, Flask, Streamlit, Redux, Angular

Libraries: pandas, NumPy, Matplotlib, Pytorch, TensorFlow, Keras,

Other Technologies: Git, NoSQL, VS Code, Visual Studio, Postman, Azure Pipelines, Azure B2C, Azure Devops
